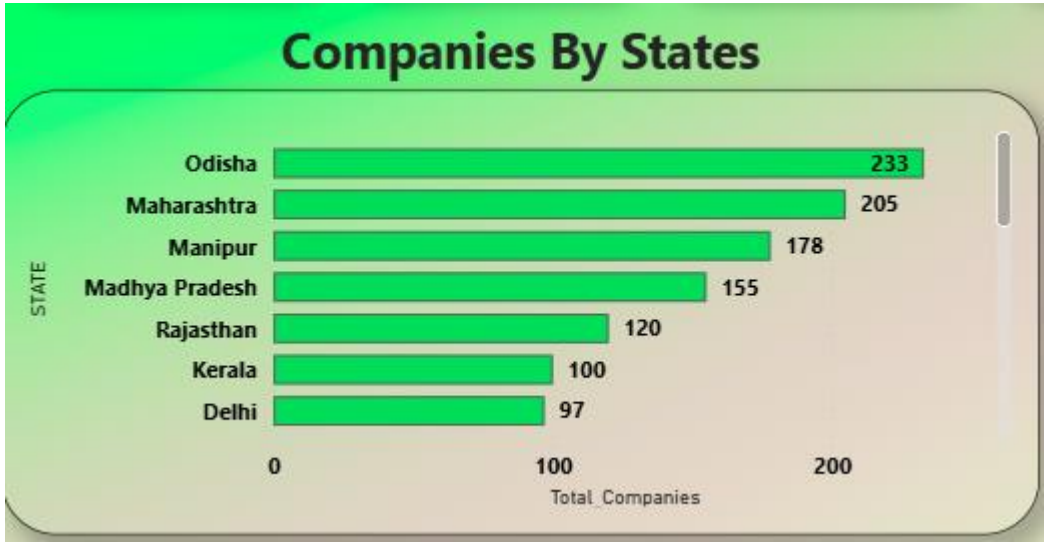
- **Total Companies:** 1,647
- **Total States Covered:** 27
- **Total Locations:** 191
- **Total Employees:** 1,643

- **Company distribution by state and city**
- **Breakdown of paid vs unpaid roles**
- **Internship vs job ratios**
- **Key designations across organizations**
- **A map showing company presence across India**

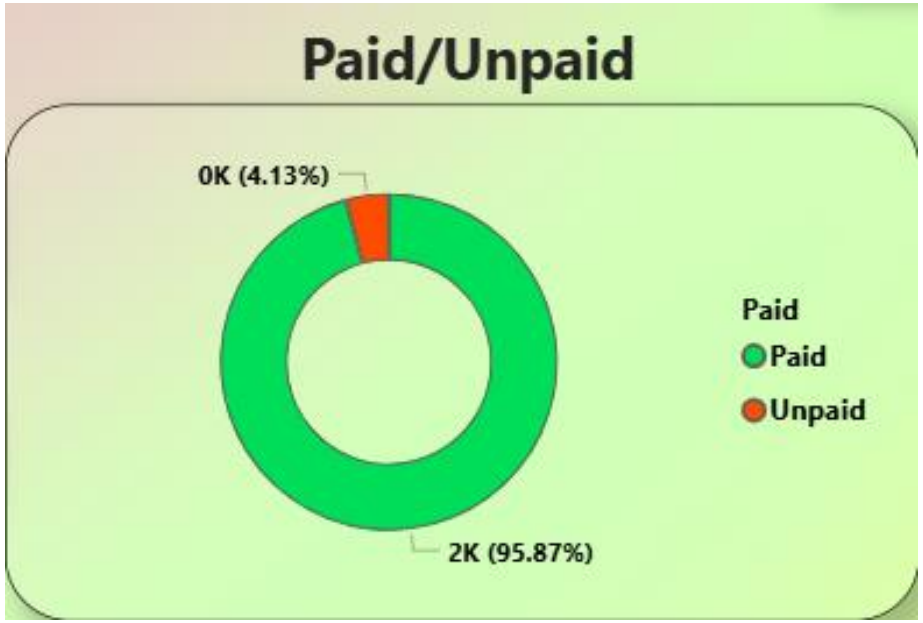
Key Insights – Company Distribution :

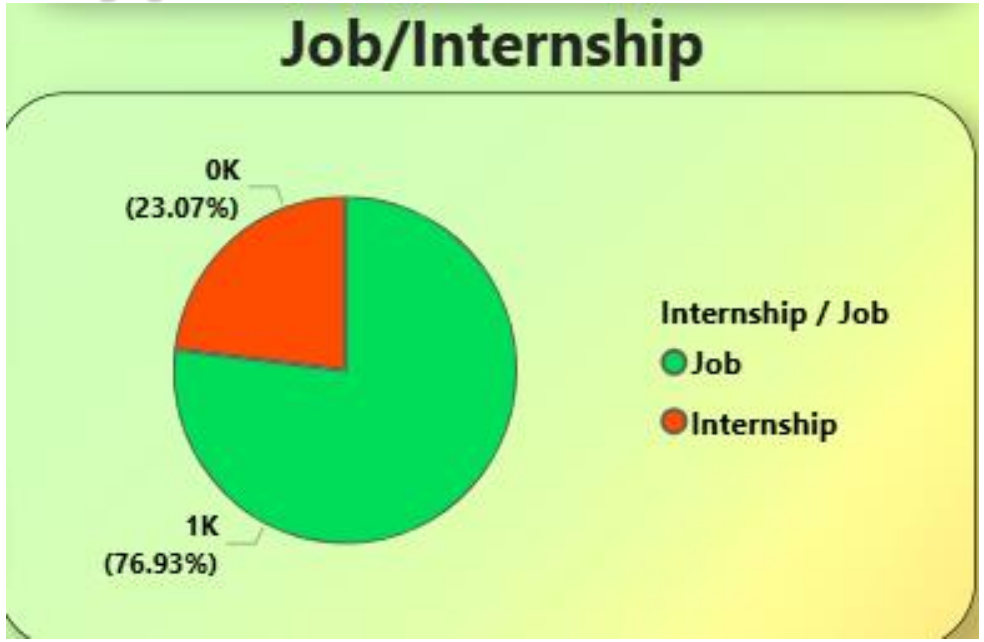


- **Odisha (223), Maharashtra (205),** and **Manipur (178)** have the highest number of companies.
- Major locations include **Imphal, Nashik, and Bijnor**.
- Companies are mainly concentrated in **eastern and western India**, where business and education hubs are strong.

This shows that certain states are becoming strong centers for both internships and job opportunities.

Key Insights – Employment Type :





- About **95% of opportunities are paid**, showing a positive trend in fair compensation.
- **4% are unpaid**, often short-term internships or training roles.
- **Internships** make up around **76%** of total opportunities, while **jobs** account for **23%**.

This highlights that many companies are focusing on training and developing new talent through internship programs.

Key Insights – Designations and Roles :

- The most common roles include **Field Sales Executive, Data Analyst, HR Manager, Data Scientist, and Faculty**.

- There's a healthy mix of positions across **technical, business, and academic sectors**.

- This variety indicates a balanced demand for both tech- driven and management roles.

Recommendations :

- Encourage growth in **less-represented states** to spread employment opportunities more evenly.

- Motivate companies to **convert internships into full-time positions**.

- Strengthen **collaboration between industry and universities** to improve student placement.

- Promote **paid internship programs** that offer real-world learning and skill development.

Conclusion :

- This analysis provides valuable insights into where companies are active and what kinds of roles they offer.

- It shows a strong rise in **paid and internship opportunities**, a sign of an evolving and supportive job market.

- With the right focus on growth areas and skill development, these insights can guide better decisions in **recruitment, training, and regional planning**.

Thank You
